SOFTWARE ENGINEER

Aspiring software developer with a strong foundation in web development through completion of multiple intensive coding bootcamps. Skilled in front-end and back-end technologies with hands-on experience in building dynamic and responsive web applications.

WORK EXPERIENCE

Natours : The Tour Booking Website

Technologies Used:

- React, Tailwind, Node.Js, Express, Mongodb, Mongoose, Nodemailer, JWT

Key Features:

- Users can sign up, log in, update personal info, and manage passwords.
- Logged-in users can book tours by making online payment, view their bookings, and avoid duplicate bookings.
- Admins and lead-guides can manage bookings and tours, including creation, updates, and deletions.
- Users can write, edit, and delete reviews for booked tours.
- Admins have authority to block or activate users, and manage all reviews and bookings.

The Wild Oasis : For Managing Hotel Operations

Technologies Used:

- React, Supabase, React Query, React Router, React Hook Form, React Hot Toast, Recharts.

Key Features:

- Secure login for hotel employees.
- Employees can manage profiles and perform full CRUD operations on cabin details.
- Comprehensive booking management, including check-ins, check-outs, and guest information handling.
- Access to important metrics, configurable settings, and dark mode for enhanced user experience.

The Wild Oasis : For Users Reservations

Technologies Used:

- React, Next Js, Tailwind, OAuth, Supabase, React Query, React Router, React Hook Form, React Hot Toast.

SKILLS

Frontend Development

- HTML, CSS, Javascript
- React, Redux, React Query
- Tailwind, Bootstrap, ShadcnUI

Backend Development

- Node Js, Express Js, Next Js
- Mongodb, Mongoose, Supabase
- Git, Github, Postman

EDUCATION

Bachelor in Computer Science | The Islamia University Of Bahawalpur

Ultimate React Course | By Jonas Schmedtmann | Completed: 2024

Node.js, Express, MongoDB Course | By Jonas Schmedtmann | Completed: 2024

The Complete Web Development Bootcamp |By Angela Yu | Completed: 2023
